PART II: CENSUS TRACT DATA 16

INTRODUCTION

The Social Planning and Research Council is continually involved in the process of providing socio-economic information to the Hamilton-Wentworth community.

This collection of statistics is an update of the previous 1979 edition entitled the Social Planning Data Book. Because of the demand for a wider array of socio-economic data, we have expanded the size and scope of the data base in this document.

This process has been facilitated by the release of the 1981 Census (Statistics Canada). The statistics in this report have been drawn from the 1981 Census for the Hamilton Census Metropolitan Area (C.M.A.). Key social indicators are presented for all census tracts in the Regional Municipality of Hamilton-Wentworth.

A number of Census-related publications, further to this one, are planned for the future.

A companion document to this one, called the Socio-Economic Atlas for Hamilton-Wentworth, 1981 Census, should be available shortly. The Atlas provides geographic pictures of the information presented in this Data Book.

We hope you find this report informative and useful. Your comments would be appreciated.

HOW TO USE THIS DOCUMENT

b) generally, the population must be between 2,500 and 8,000, with a preferred average of 4,000 persons;

c) the area must be as homogeneous as possible in terms of economic status and social living conditions; and

d) the shape must be as compact as possible.

Age:

Refers to age at last birthday (as of the census reference date, 3 June 1981).

Mother Tongue:

The first language learned in childhood and still understood by an individual.

Religion:

Refers to specific religious groups or bodies, denominations, sects, cults or religious communities.

Labour Force Activity:

The labour market activity of the population 15 years of age and over, excluding inmates, who, in the week prior to enumeration (3 June 1981) were employed, unemployed or not in the labour force.

Employed:

Includes those persons who, during the week prior to enumeration:

a) did any work at all; or

b) were absent from their jobs or businesses because of own temporary illness or disability, vacation, labour dispute at their place of work, or absent for other reasons.

Unemployment Rate:

Refers to the percentage the unemployed force forms of the total labour force (in the reference week) in an area, group or category. The unemployed includes those persons who, during the week prior to enumeration:

a) were without work, had actively looked for work in the past four weeks and were available for work; or

b) had been on lay-off for 26 weeks or less and expected to return to their job; or

c) had definite arrangements to start a new job in four weeks or less.

Value of Dwelling:

The amount expected by the owner if the dwelling were to be sold.

Average Income:

The average family/household income refers to the weighted mean total income of families/households in 1980. (Family/household total income refers to the sum of the total incomes of the members of the family or household, 15 years of age and over).

Average Employment Income:

The weighted mean total employment income per unit of a particular group. (Employment income refers to the total income received by persons 15 years of age and over during 1980 as wages and salaries, net income from non-farm self employment and/or net farm income).

Average Census Family Income:

Refer to definition of 'Average Income'.

Average Private Household Income:

Refer to definition of 'Average Income'.

Economic Family:

A group of two or more persons who live in the same dwelling and are related to each other by blood, marriage or adoption. Persons living common-law are considered, for census purposes, as now married.

Incidence of Low Income:

The incidence of low income is the percentage of family units below the low income cut-off points. On the basis of the total income of a family unit adjusted for federal Child Tax Credit, size of family limit and size of the area of residence, the position of each unattached individual and economic family is determined in relation to low income cut-offs based on the 1978 Family Expenditure Survey and updated by changes in the Consumer Price Index.
